Reasons for Allowance

The following is an examiner's statement of reasons for allowance: Applicants' arguments, filed 9/22/04, were found convincing to overcome the rejection issued in the Office Action dated 6/16/04. Additionally, applicants' treatment process of a solution containing an organic compound having a fluorocarbon chain is unobvious over the prior art or record. Although the closest prior art of record {WO 9410973} teaches that layered double hydroxides may be prepared by adding divalent and trivalent metal salts to a solution containing nonhalogenated compounds such as monocarboxylic acids, monoalkyl and monoalkyl ether sulphates, alkyl benzene sulphonates and/or mixtures thereof, the prior art of record does not teach or suggest adding the divalent and trivalent metal salts to a solution containing a fluorinated organic compound. Also, the Hiroaki et al. reference (applied in the Office action issued 6/16/04) does not teach or suggest adding divalent and trivalent metal salts to a solution containing an organic compound having a fluorocarbon chain. Instead, the Hiroaki et al. reference is teaching the intercalation of a fluorinated surfactant in a layered double hydroxide (LDH) via an ion exchange of the fluorinated surfactant with a nonhalogenated compound complexed with the LDH or via a coprecipitation method. All claims (1-10 and 12-25) are allowed.

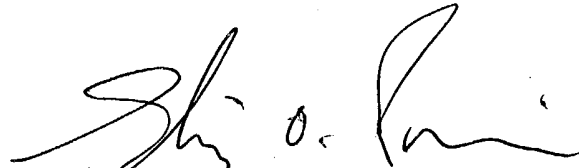

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
